

THANAKHON OONKLAN

FULL STACK DEVELOPER

Hello, I'm JJ, a developer continuously improving my skills to become a Full Stack Developer.

I have a solid foundation in Frontend Development and am expanding into Backend to develop both areas, alongside an interest in IoT and Robotics.

Phone: 089-614-1138

King Mongkut's University of Technology North Bangkok, Prachinburi Campus (2nd Year)

Bachelor of Industrial Technology Program in Information Technology (Continuing Program)

PROJECTS

In-silico Risk Screening Platform (NSC 2026 Finalist)

(Jun 2026 – Aug 2026)

- Developed Frontend, designed UI and interactive Formula Builder for real-time chemical risk assessment.
- Applied React Three Fiber for 3D anatomical simulation displaying irritation levels over time.
- Selected as one of the 13 national finalist teams in NSC 2026 competition (Science and Technology Software category).

Thinking Skills Games for Kids (Web Application)

(Jun 2025 – Apr 2026)

- Designed and developed web pages, 7 interactive mini-games, characters, and animations to be intuitive and engaging for kids.
- Built game logic, score calculation, and leaderboard ranking systems supporting both Thai and English.
- Designed responsive layouts to ensure smooth gameplay across all screen sizes, including mobile, tablet, and desktop.

ESP32 Wireless Robot Controller (IoT & Robotics)

(Oct 2023 – Dec 2023)

- Programmed C++ on ESP32 board for real-time wireless robot control and data transmission via Wi-Fi.
- Designed electronic circuits and PCB, assembling a 360-degree omnidirectional drive system.
- Won 2nd place award in the National Contest of the New Generation (Invention and Innovation Competition).

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, shadcn/ui

Backend & Database: Node.js, RESTful APIs, MySQL, Supabase

Interactive & Animation: GSAP, Three.js, React Three Fiber

Tools & DevOps: Git, GitHub, Docker, Vercel, Figma, Postman, VS Code

Hardware & IoT: C++, Arduino, ESP32, Industrial Robotics

EXPERIENCE

Freelance Full Stack Developer | IoT Equipment System

(Aug 2025 – Mar 2026)

- Designed and developed an end-to-end IoT equipment borrowing and returning system from scratch to deployment.
- Built role-based access control (Admin / Staff / Student) with a dashboard summarizing real-time equipment status.
- Successfully delivered the project on schedule, which was actively adopted and used as a graduation project.

Internship — Wireless Solution Asia | Robotics & Software Engineering

(Apr 2025 – May 2025)

- Collaborated on web and UI development for the ide.up-skill.asia platform, structuring layouts and interactive elements.
- Designed and assembled wireless ESP32 robot cars, utilizing 3D printers to fabricate structural components.
- Served as a teaching assistant in basic Arduino and IoT for elementary school students at Damrongratsongkroh School.

Industrial Robot Programmer | 31st National Skills Competition

(Jun 2026 – Jul 2026)

- Programmed industrial robots (ABB, KUKA, Yaskawa) for Joint, Linear, and Circular motions via Teach Pendant.
- Configured Tool Frames, WorkObjects, and sequential logic integrating I/O signals with push buttons, status lights, and grippers.
- Developed and applied code templates to solve complex challenges accurately and rapidly under strict competition time limits.
